

# Q-CASE

## Security system for cash transportation

IBNS intelligent banknote neutralization system.

The Q-CASE is an advanced security solution for cash logistics and transportation, designed to protect large volumes of banknotes during transit and daily operations. Thanks to its IBNS (Intelligent Banknote Neutralization System) technology, it immediately neutralizes cash in the event of any intrusion attempt, minimizing risks to personnel and the public.

Its compact, ultra-lightweight, and highly secure design makes it the ideal solution for cash-in-transit companies, banks, retail businesses, and high-demand operational environments. Equipped with an electronic key system, intelligent sensors, and full event logging, the Q-CASE delivers comprehensive end-to-end protection without the need for armored vehicles or firearms.

### Featured solutions

- Superior security thanks to a patented, ultra-fast banknote staining solution.
- Market-leading combination of lightweight design and high load capacity.
- Compact top-loading design with low weight distribution for improved ergonomics.
- Requires minimal floor or tabletop space.
- Smart, modular, and flexible shelving solutions tailored to customer needs.
- Banknotes can be loaded and unloaded while positioned on a shelving unit.
- Protects valuables without the need for weapons or costly armored vehicles.

### Electronic security key

- Authorizes the secure opening of the case or container.
- Arms and disarms the IBNS system.
- Prevents accidental activation of the banknote neutralization system.
- Forms part of the unit's electronic security system.

## Models

### Q-CASE MINI

The Q-CASE MINI is a secure case for transporting large amounts of cash, ideal for all types of cash-in-transit vehicles, including armored and non-armored vehicles.

- Capacity for up to 5,000 unfit banknotes.
- Empty weight: 6.1 kg.
- Market-leading B/C ratio of 0.82.
- High-speed banknote neutralization system.
- Superior and irreversible staining process in milliseconds.
- Multiple sensors to detect intrusion attempts.

### Q-CASE MAXI

The Q-CASE MAXI is a secure case for transporting large amounts of cash, ideal for all types of cash-in-transit vehicles, including armored and non-armored vehicles, and it can also transport an unprotected ATM cassette.

- Capacity for up to 8,000 unfit banknotes or one ATM cassette.
- Empty weight: 7.8 kg.
- Market-leading B/C ratio of 1.03.
- High-speed banknote neutralization system.
- Superior and irreversible staining process in milliseconds.
- Multiple sensors to detect intrusion attempts.

### Q-COLLECTOR MAXI

The Q-COLLECTOR MAXI features a specially designed deposit hatch. Sealed plastic bags containing banknotes are placed into the hatch, and the user rotates them into the safe. This allows for smaller cash collections in shopping centers or retail stores. It can also be used as a safe at the checkout area or in the back office.

- Capacity for up to 8,000 unfit banknotes or 5,000 banknotes in multiple sealed plastic bags.
- Empty weight: 9.2 kg.
- Market-leading B/C ratio of 0.87 or 0.54.
- High-speed banknote neutralization system.
- Superior and irreversible staining process in milliseconds.
- Multiple sensors to detect intrusion attempts.
