

BNE-R10

Mini Cash Recycler

High-speed recycling for retail in tight spaces

The BNE-R10 is a high-speed **mini cash recycler** designed specifically for **retail** environments where space is limited. Its compact, **modular** design — with independent validation and cassette/drum modules — maximizes operating efficiency without sacrificing capacity or reliability, with multiple interfaces and security configurations compatible with **UL291** and **CEN IV** standards to scale as needed.

Features

- Compact design optimized for retail
- High-speed deposit: 5 notes per second
- Dispensing of up to 4 notes per second
- Independent validation and cassette modules
- Up to 3 recycling cassettes with 2 drums each
- 3,000-note acceptance cassette
- 500-note loading cassette
- 30-note counterfeit cassette
- 50-note input (optional 200)
- 20-note output
- Safe compatible with UL291 and CEN IV
- Optional 2, 6 or 8 mm metal plate
- Ethernet, USB 2.0 and RS232/RS485
- Easy modular maintenance

Technical Specifications

Specification	Detail
Cash-in capacity	50 notes (standard) / 200 (optional)
Cash-out capacity	20 notes
Input speed	5 notes/s
Output speed	4 notes/s (without BV) / 2 notes/s (with BV)
Recycling cassettes	Max. 3, with 2 drums each (60 notes/drum)
Acceptance cassette	3,000 notes
Loading cassette	500 notes
Counterfeit cassette	30 notes
Safe	Optional 2/6/8 mm plate, compatible with UL291 and CEN IV standards
Communication	1× Ethernet, 1× USB 2.0, 1× RS232/RS485
Power supply	100-242 V, 50/60 Hz
Dimensions (D×W×H)	600 × 160 × 680 mm
