

BNE-S110M

Cash Deposit Module

Advanced multi-detection with an integrable modular architecture

The BNE-S110M is a high-performance **cash deposit module** that combines advanced **multi-detection** technology to deliver superior accuracy in counterfeit recognition and secure cash processing. Its **modular architecture** simplifies maintenance, speeds up service and reduces operating costs, while its flexible integration design adapts to different safes and specific customer requirements.

Features

- Speed of 12 notes per second
- Advanced multi-detection of counterfeits
- Modular, easy-maintenance architecture
- Flexible integration with different safes
- 5" touch screen for intuitive operation
- Counting with authentication
- Fitness sorting
- Serial number recognition
- Detects soiling, tape, stains and tears
- Detects folds and double notes
- 500-note input per operation
- 200-note escrow and 100-note reject
- USB, Serial and LAN ports
- Only 17 kg

Technical Specifications

Specification	Detail
Cash-in capacity	500 notes
Reject capacity	100 notes
Escrow capacity	200 notes
Speed	12 notes/s
Touch screen	5"
Detection technology	Soiling, tape, graffiti, stain, hole, tear, de-inked, watermark, missing corner or edge, dog-ear, double note
Functions	Counting with authentication, fitness sorting, serial number recognition
Communication ports	USB, Serial, LAN
Input voltage	100-240 V +/-10%, 50/60 Hz
Dimensions (W×D×H)	323 × 340 × 317 mm
Weight	17 kg
