

Kuan TTW

Through-The-Wall Deposit Terminal

High-capacity continuous deposit
with rear bag access

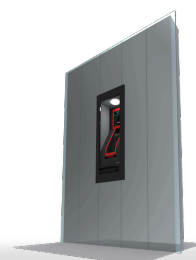

The Kuan TTW is a **through-the-wall deposit terminal** with rear bag access, designed for high-volume deposits. It supports **continuous deposit** at 1,000 notes per minute with a capacity of up to **20,000 notes**, advanced multi-spectral authentication and a cut-resistant **cordura** bag with an automatic locking mechanism. Its safe meets the **UL291** standard with half-inch steel and CEN III and CEN IV certifications, with a 15.6" front and 7" rear touch screen.

Features

- High-speed continuous deposit
- Up to 1,000 notes per minute
- Capacity of up to 20,000 notes
- Rear bag access
- Knife-resistant cordura bag
- Metal plate with automatic locking
- Escrow as standard — supports envelope deposit
- 500-note hopper with continuous deposit
- Multi-spectral authentication: UV, IR, white light, fluorescence, security thread, thickness
- Jam rate of only 0.001%
- 15.6" front and 7" rear touch screens
- UL291 safe with 1/2-inch steel
- UL291, CEN III and CEN IV certifications
- 80 mm thermal printer (48/56 mm optional)
- Kuan App and mCloud software on Windows
